## THE NEW FRIDAY NIGHT FAMILY PLAN! LIBERTY SCIENCE CENTER PRESENTS: **EXTREME LSC**

*BLAST OFF INTO A BRAND-NEW ADVENTURE WITH EXCLUSIVE ENTERTAINMENT FOR KIDS*

**JERSEY CITY, N.J., November 18, 2019** – Laser Tag! Slime! A massive ball pit! Liberty Science Center’s newest and most exciting adventures are only available during the brand-new event series **Extreme LSC**. It’s Friday night action like never before, and it launches Friday, November 22, continuing every fourth Friday of the month from 6 to 10 pm.

At **Extreme LSC**, kids can challenge themselves and each other in LSC’s new laser tag arena, get messy with scientific slime experiments they’ll take home, and search for hidden objects and science facts in a giant ball pit. Special programming in the Jennifer Chalsty Planetarium—the largest in the Western Hemisphere—will have kids soaring through space and rocking out to laser shows set to their favorite songs. Outside, high-powered telescopes and space experts will be on hand for guests to peek at the wonders the real night sky has to offer.

Guests attending Extreme LSC can explore the Science Center’s permanent exhibitions where they’ll climb 30 feet above the floor in the *Infinity Climber*, navigate the pitch-black *Touch Tunnel*, and come face-to-face with the animals of *Eat and Be Eaten*. The latest premium exhibition, *Angry Birds Universe: The Art & Science Behind a Global Phenomenon*, will immerse guests in a real-life version of the ever popular video game.

LSC’s café will be open, serving food and special treats throughout the evening. Accompanying adults ages 21 and over can enjoy a menu of beer and wine.

Admission to *Extreme LSC* is running with a limited time online discount: \$15 for kids, and \$20 for adults. After the discount ends, all tickets will rise \$5. To learn more, please visit [LSC.org/extreme](https://lsc.org/extreme).

### **About Liberty Science Center**

Liberty Science Center ([LSC.org](https://lsc.org)) is a 300,000-square-foot not-for-profit learning center located in Liberty State Park on the Jersey City bank of the Hudson near the Statue of Liberty. Dedicated to inspiring the next generation of scientists and engineers and bringing the power, promise, and pure fun of science and technology to learners of all ages, Liberty Science Center houses the largest planetarium in the Western Hemisphere, 12 museum exhibition halls, a live animal collection with 110 species, giant aquariums, a 3D theater, live simulcast surgeries, a tornado-force wind simulator, K-12 classrooms and labs, and teacher-development programs. More than 250,000 students visit the Science Center each year, and tens of thousands more participate in the Center’s off-site and online programs. Welcoming more than 750,000 visitors annually, LSC is the largest interactive science center in the NYC-NJ metropolitan area.
