LIBERTY SCIENCE CENTER TO OPEN *DINOSAUR TRAIN: THE TRAVELING EXHIBIT ON SEPTEMBER 21*

*Travel Through Time on a Magical Train Ride with Buddy the Tyrannosaurus rex,
and Explore the Thrilling Land of Dinosaurs*

JERSEY CITY, N.J., September 19, 2019 – Liberty Science Center’s newest adventure for young learners, *Dinosaur Train: The Traveling Exhibit*, opens Saturday, September 21. Based on the popular PBS KIDS TV series *Dinosaur Train*, the exhibit invites kids to join Buddy, a curious *T. rex*, on an interactive journey around the world and back in time to discover all there is to know about dinosaurs.

“This exhibit embraces and celebrates the fascination kids have with both dinosaurs and trains,” said Paul Hoffman, President and CEO of Liberty Science Center. “The fun, interactive elements will enable young guests to travel back to the time of dinosaurs to unearth basic concepts in life science, natural history, and paleontology.”

Created by The Magic House in collaboration with The Jim Henson Company, the exhibit features five zones filled with hands-on activities. Highlights invite guests to:

- Hop on the Dinosaur Train and travel to all three time periods during the Age of Dinosaurs while dancing along to Buddy’s favorite songs from the show, such as *I Love Trains* and *Great Big Stomping Dinosaur Feet*
- Learn the characteristics of herbivores, carnivores, and omnivores, and how dinosaurs are classified into these groups
- Explore math concepts by studying the different sizes and measurements of dinosaurs
- Interact with real and replica fossils and learn how scientists use fossils to make dinosaur discoveries

Dinosaur Train: The Traveling Exhibit runs through January 20, 2020, and is available with the purchase of Science Center admission. To learn more, please visit LSC.org.

About Liberty Science Center

Liberty Science Center (LSC.org) is a 300,000-square-foot not-for-profit learning center located in Liberty State Park on the Jersey City bank of the Hudson near the Statue of Liberty. Dedicated to inspiring the next generation of scientists and engineers and bringing the power, promise, and pure fun of science and technology to learners of all ages, Liberty Science Center houses the largest planetarium in the Western Hemisphere, 12 museum exhibition halls, a live animal collection with 110 species, giant aquariums, a 3D theater, live simulcast surgeries, a tornado-force wind simulator, K-12 classrooms and labs, and teacher-development programs. More than 250,000 students visit the Science Center each year, and tens of thousands more participate in the Center’s off-site and online programs. Welcoming more than 750,000 visitors annually, LSC is the largest interactive science center in the NYC-NJ metropolitan area.
