

SOCIAL NARRATIVE

MY VISIT TO **LIBERTY SCIENCE CENTER**

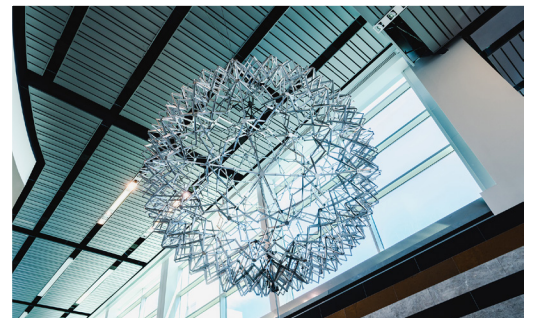

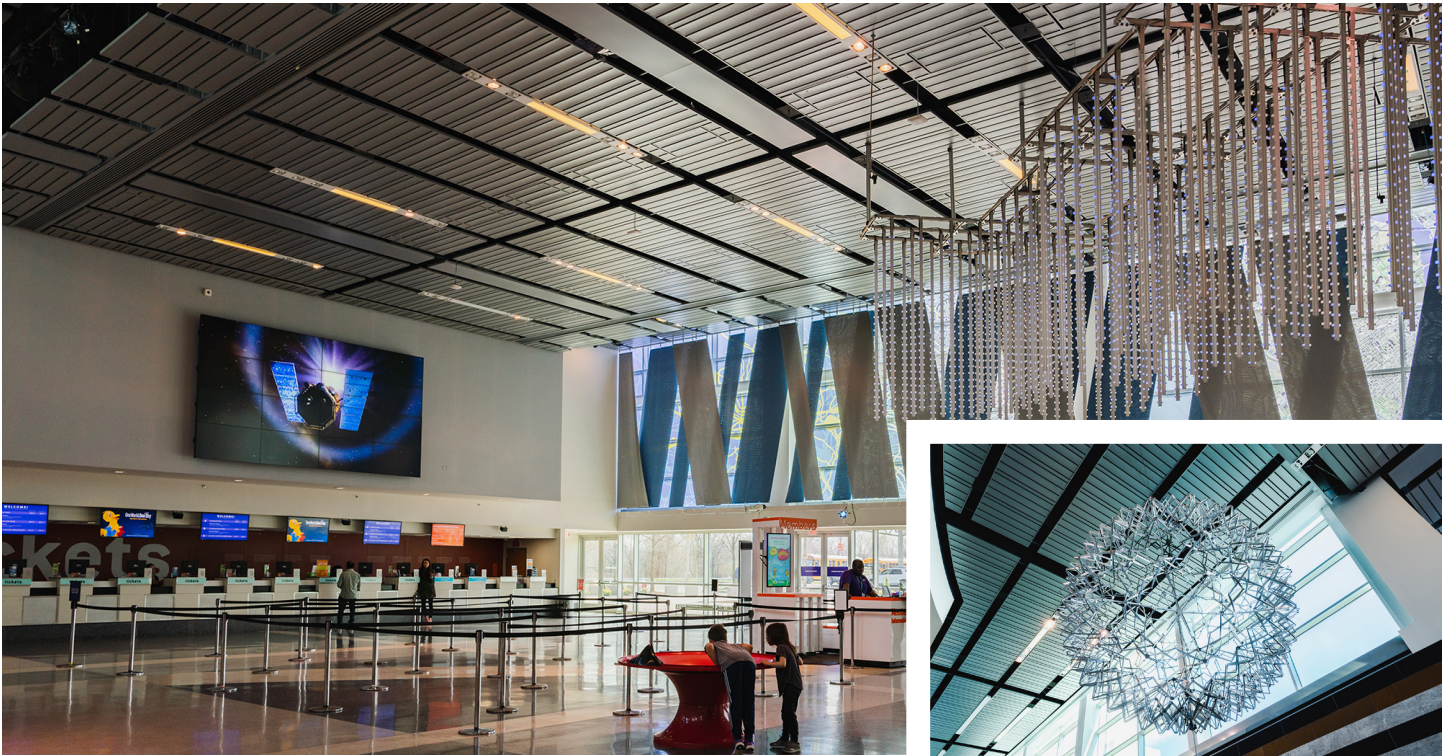

Introduction

I am going to Liberty Science Center. Some people call it LSC. People visit to learn about science and to have fun. I can see animals at LSC. I can see a person doing a science show for a group of people. I might see a show in a theater. First, I go in the big glass doors.

Lobby & Tickets

A guard wearing a uniform will be at the door. There may be a lot of people in the lobby. It may be noisy. I may have to wait in line. I will see the Hoberman Sphere. It looks like a big ball. Sometimes it opens and closes quickly. I will see many people wearing a uniform in LSC. I can ask them questions and they will help me. I give them my ticket and now I can go inside!

Getting from Place to Place

JENNIFER CHALSTY
PLANETARIUM

There are four levels at LSC. To get from one floor to another, I may walk up stairs. I may ride an elevator. If a lot of people are trying to ride the elevator, I may have to wait for my turn.

I can find bathrooms on every floor. I can find helpers who work at LSC on every floor.

Second Floor

On the Second Floor, I can look up and see people climbing on the *Infinity Climber*. I will also see colorful screens with words on them. If it's time for a snack or lunch, I can go to the cafe to buy food. I may smell the food cooking in the kitchen. I may see someone in a uniform teaching about science. I will watch and it will be fun!

Third Floor

On the Third Floor, I will see monkeys, snakes, frogs, honey bees, tortoises, and birds. I can look through the glass and see where the animals live. Helpers may show a live animal outside its home. These helpers know how to keep everyone safe.

If I'm tall enough (42"), I can go in the *Infinity Climber*. Inside the *Infinity Climber* I can look down and see the museum and people walking around below me. I can go in the *Touch Tunnel*. It is a dark tunnel and I will use my hands to feel the wall and crawl out.

Third Floor

I will see *Microbes Rule!* It has colorful images of tiny living things. I can make my own art and maybe sign up at the lab to do an experiment. There is also a Big Blue Nose that makes a sudden, loud sneezing sound!

Fourth Floor

On the Fourth Floor, I will see *Our Hudson Home*. It has big and little fish, turtles, and other sea animals that live in the Hudson River. I can look at them in the fish tanks. I can also look out the big window and see tall buildings.

In the *Energy Quest* gallery I will learn about power and what makes things move! Someone in a uniform may show me the power of electricity or air.

Outside

If the weather is nice and warm, I can go outside on the balcony. I will see Liberty State Park and New York City buildings across the Hudson River!

Leaving

When it is time to leave, I return to the first floor and exit through the big glass doors. I will pass the gift store on the way out. There was so much to see and do at LSC. I may not have seen and played with everything. Maybe I can come back another day to play and learn more. I had fun today!
